

logco-strike CMO

Release Agent for Concrete & Steel

Description logco-strike CMO is an invert emulsion (ie. Water-in-oil emulsion) commonly known as "Soap Oil". It is an economical dual purpose mould oil in that it is suitable for both timber and metal based formwork providing an ideal release agent for ordinary day-to-day concreting.

- Advantages**
- Easy to use
 - Low cost
 - Supplied ready to use
 - Suitable for both timber and metal based formwork
 - Not readily absorbed when used with plywood or timber formwork
 - Produces uniform, stain-free concrete surfaces
-

Application logco-strike CMO is supplied ready to use, a uniform thin film should be applied to the formwork using a brush, sponge or soft broom with care being taken to avoid over application.

Under no circumstances should logco-strike CMO be spray applied.

For new and unsealed timber several applications should be made prior to initial use.

Technical Data	Appearance	Cream/White emulsion
	Specific Gravity @ 15.6c	0.966
	Flash Point (PMCC)	N/A (Water Based)
	Freezing Point	0°C
	Average Coverage	12-14m ² /litre
	Shelf Life (sealed container)	12 months minimum

Health & Safety

When working with logco-strike CMO suitable protective clothing, eye/face protection and gloves should be worn.

For further health and safety information, please refer to the relevant Safety Data Sheet

Packaging

logco-strike CMO is available in 5, 20 and 200 Litre Containers. IBC's available on request.

Storage

logco-strike CMO should be stored under dry, frost-free conditions away from direct sunlight, under such conditions the shelf life is at least twelve months.

Drums/Barrels containing logco-strike CMO should never be stored without being sealed as irreversible separation can occur

Important Note

Whilst all reasonable care is taken in compiling technical data on the Company's products, all recommendations or suggestions regarding the use of such products are made without guarantee, since the conditions of use are beyond the control of the Company. It is the responsibility of the customer to satisfy himself that each product is fit for the purpose for which he intends to use it, that the actual conditions of use are suitable, and that in the light of our continual research and development programme the information relating to each product has not been superseded.
